Support letter for colleagues from Argentina working in research and academia

We are the French Association of Mechanics, a scientific society, and want to express our good cooperation and relation with our colleagues in mechanics and mechanical engineering for training and for research.

The cooperation between our two countries is fruitful for many years. We achieved with Argentinian scientists' important scientific advances and training exchanges and want to continue in the same line.

We are convinced having a flourishing national system for science and technology is key for the development of nations.

Supporting research as a strategic priority is the only investment contributing to sustainable science and technology for citizens and societies. The French Association of Mechanics supports this universal vision, in any country constructing its own and collective future.

All our support to our colleagues working in research and academia.

Sincerely,

A handwritten signature in black ink, appearing to be 'Francisco Chinesta', is located below the text 'Sincerely,'.

Francisco CHINESTA, President,
French Association of Mechanics,
in behalf of the Governing Council of the French Association of Mechanics
