

February 13, 2024

Mr. Chief of the Cabinet of Ministers, Engineer Nicolás Posse
c.c. Mr. President of CONICET, Dr. Daniel Salamone
c.c. Members of the Board of Directors of CONICET

We are appalled by the news coming out of Argentina of how the prestigious Argentine national science and technology system has been brought to a standstill due to the actions and inactions of your government.

Stopping PhD fellowships and promotions, ceasing the transfer of already committed funds to ongoing research projects and firing administrative employees in research institutions are all having a devastating effect on the national scientific and technology system of Argentina.

On behalf of the board of the Norwegian Mathematical Society I write to express our support to the Argentine scientific community in these trying times, to ask you to listen to their demands and to work with them towards restoring a system that once again allows your very talented scientists and technologists to thrive and keep up the good work and the important scientific advances they have been producing.

Having a flourishing national system for science and technology is key for the development of nations.

Sincerely,

Bjørn Ian Dundas
Professor
